INTERNATIONAL FEDERATION  
OF LANDSCAPE ARCHITECTS

## **Mission Landscape With our Border**

The LAWB group reclaims the role that landscape design, planning and management could play in the context of **global challenges** (displacement and migration, climate change and natural disasters, social justice and right to the landscape) by managing natural resources sustainably, and by contributing to local livelihoods through a thorough integration of ecological performance, design culture and social equity.

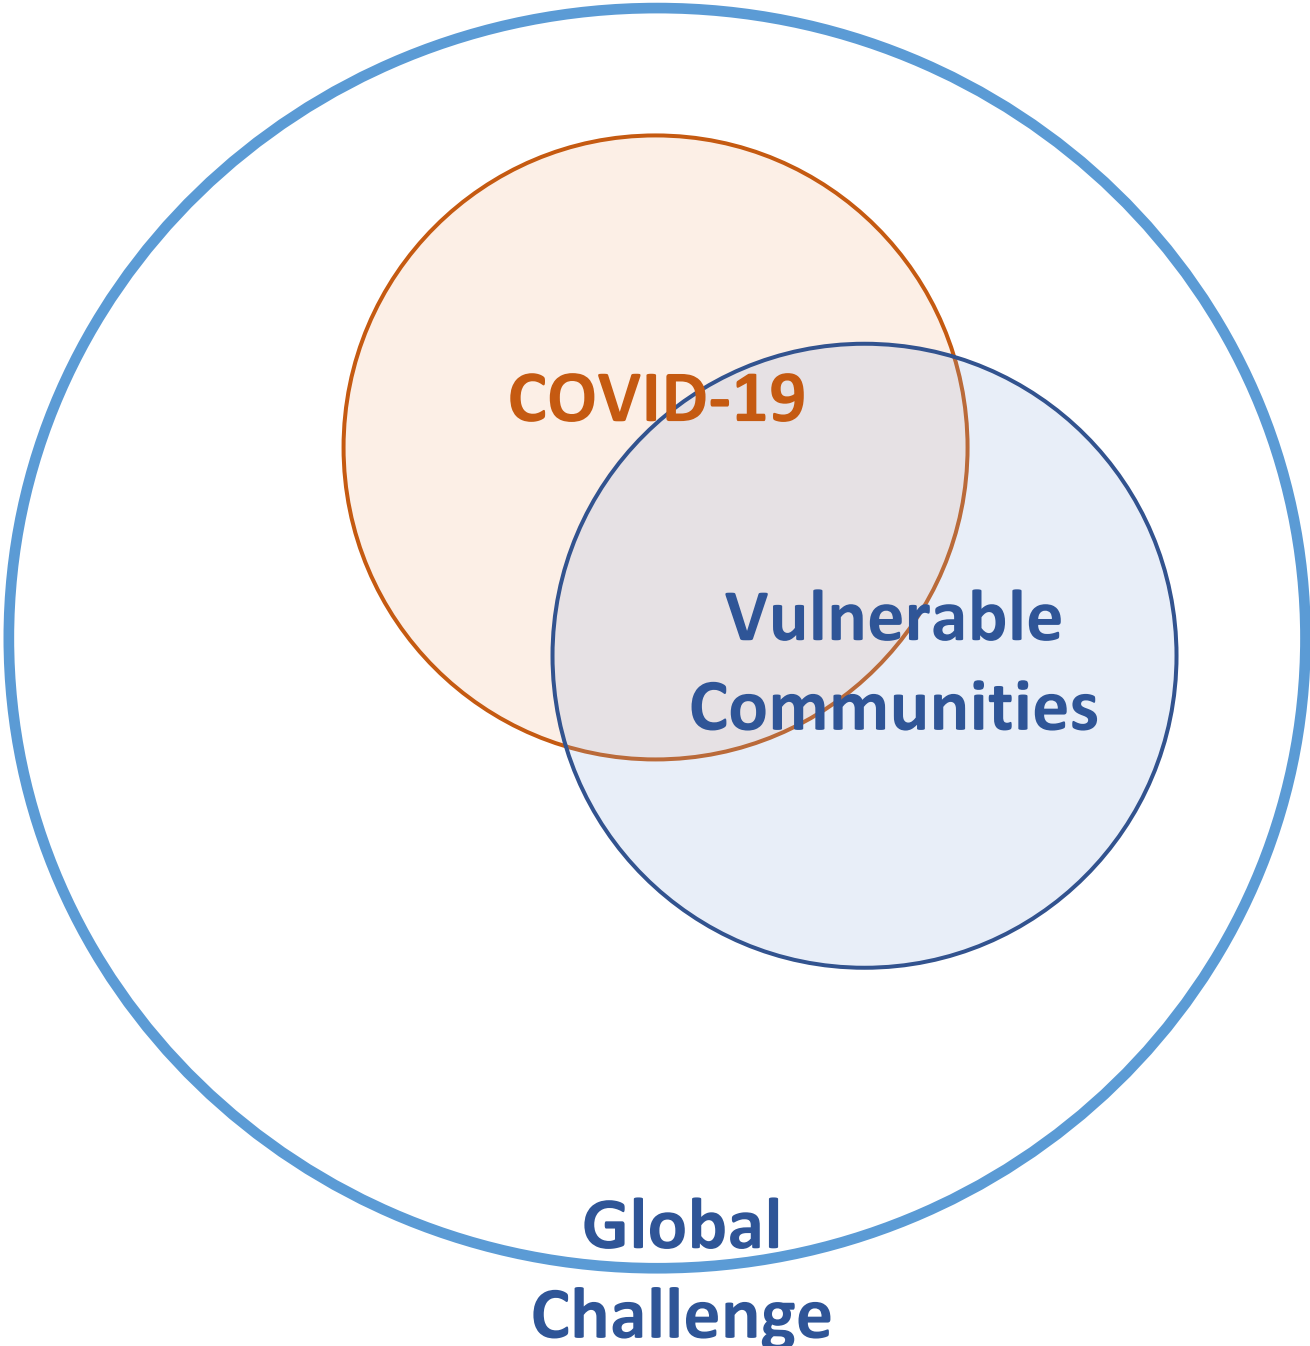

As a humanitarian group we are concerned with the need to enable equal access to **landscape services** whenever and wherever they are non-existent or scarce. We are committed to work with vulnerable and disadvantaged communities, especially those affected by war, conflict and natural disaster, helping them to re-create safe, sustainable and dignified living conditions.

#Conversation with IFLA APR #President, Mr Fumiaki Takano  
Kotchakorn: It's so nice to have you with us today. Mr. Takano.  
Takano: Hi Kotchakorn, we were planning to invite you to Japan in March to visit the natural disaster site of the tsunami in 2011, together with Professor Uehara. We wanted to have your lecture in Tokyo, and we were excited to have a meeting of landscape architects there. It is unfortunate we had to cancel that due to the pandemic.... See More

"Landscape Architects Without Borders aims to provide all humans with a healthy and livable environment using integrated design processes that affect the landscape at different spatial and temporal scales. In the face of the global crisis caused by mass displacement and urbanization, LAWB seeks to actively cooperate with national and international NGOs and local government."
